

OUR MIST DIFFUSERS

WHAT IS IT?

This diffuser **uses water** to disperse the **few drops of essential oils** that you add to it. An ultrasonic disc **transforms the water-oil mixture** into a **cold steam** which creates a **pleasant aromatic mist** that is **naturally scented**.

WHY USE IT?

Ideal for **medium sized rooms**. These diffusers allow you to **purify, slightly humidify** and **naturally scent your home** or work environment. Models feature the added benefit of **multicolored lights** and **timers**.
