

OUR NEBULIZERS

WHAT IS IT?

Nebulizing is the purest and strongest form of diffusing essential oils. **It is recommended for therapeutic and professional use.** A nebulizer diffuser uses an air pump to atomize the pure essential oil into very tiny droplets releasing its powerful scent. No water or heat is used.

WHY USE IT?

A nebulizer diffuser only use **pure essential oils** which delivers the maximum effectiveness when it comes to enhancing emotional and health benefits. A **few minutes** of diffusion are enough to **purify the air** in large spaces of up to **1 000 sq.ft.** It is very easy to use, with an eco-friendly design that will stand out in your decor.
